Abstract of CN1339415

The high strength flyash brick is produced by using flyash as main material and adhesive as supplementary material, and through wheel rolling to mix, stirring to mix, rolling, aging, cylinder mixing and purifying, vacuum extruding to form, drying of adobe and gas sintering in tunnel kiln. The present invention uses waste slag and this is favorable to save field land and protect environment. The high strength flyash brick may be used to replace red brick in building.
